

## Fall in Love with Your Feet

Are you the person who wishes they could wear the cute sandals or flip-flops? Are you ashamed of the way your feet look? Well here at Beaver Valley Foot Clinic, we can have you showing off your feet by summertime. Many suffer from heel pain, bunions, hammertoes, thick toenails, corns, dry skin and plantar warts. We treat all of these!

If your heel hurts with your first step out of bed in the morning, you may have plantar fasciitis. One 20 minute office procedure, ESWT, can cure up to 90% of even the most stubborn, long term heel pain.

A bunion is a bump below your big toe, or baby toe. A bunionectomy removes the bunions. There is a 6 week healing time, so we can

have you in those sandals by late spring.

Hammertoes- toes that have abnormal bending of the joints, cause the toes to rub in shoes causing deep calluses.

Correction is a simple office procedure. You are not even put to sleep. In two weeks the stitches come out and you are on your way.

Thick painful nails are probably the main reason people hide their toes. Most insurances will pay for you to have them done at the office. We also carry a topical treatment that doesn't have the side affects of the oral medications.

Plantar warts are very contagious and not easily cured with over the counter wart removers. If warts go untreated they not only spread and cluster, they can be passed on to other family members.

Gift certificates are available for Body Beautiful Laser Medi-Spa, in time for Mothers Day or Easter. Any one can have younger and great looking skin. Put your best face forward!

So do your self a favor and make an appointment today. Call 724-375-1577. BVFootClinic.com
